Replying to @vazertuche

last release was Nov 2022: [github.com/lightninglabs/...](https://github.com/lightninglabs/taro)

next release will have just about everything needed to fully get off the ground (universe server proof bootstrap, ability to mint assets into a group, support further issuance with the group key, etc)

lightninglabs/taro

A layer 1 daemon, for the Taro protocol specification,
written in Go (golang)
